

Label

Add pluriSpin®
(50 µl per 1 ml sample)

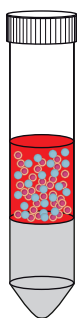

Unwanted cells are
bound to pluriSpin
suspension

Incubate 15 min
on pluriPlix® or
rolling mixer

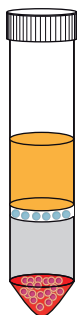

Layer over density
gradient medium

Density gradient medium

Spin

15 min at 800 x g,
Room Temperature,
brake off

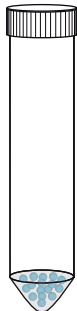

Plasma

Enriched cells

Density gradient medium

RBCs and unwanted cells

Collect

Enriched cells

- Desired cells
- Unwanted cells
- Red blood cells

Wash
